## PROFESSIONAL SUMMARY

Software Industry & Multimedia (SIM) student at Alexandria University with hands-on experience through academic projects in software development, database systems, web development, multimedia, and user experience design. Knowledgeable in Java, Python, SQL, HTML, CSS, JavaScript, object-oriented programming, and software engineering principles. Passionate about learning new technologies, solving technical problems, and continuously developing practical and technical skills through academic projects and self-learning.

## EDUCATION

**Alexandria University** Sept. 2024 – June 2028  
*Faculty of Science in Software Industry & Multimedia (SIM) , CGPA : 3.8438/4.0(Excellent)* Alexandria, Egypt

## PROJECTS

- Hotel Management System | Java, NetBeans** 2025
  - Developed a Java-based Hotel Management System using object-oriented programming concepts.
  - Implemented core functionalities through Java classes and methods in NetBeans.
  - Applied OOP principles and data structures throughout the project.
- Pharmacy Management Database System | Oracle SQL, ERD** 2026
  - Designed an Entity Relationship Diagram (ERD) for a pharmacy database.
  - Implemented the database schema in Oracle by creating tables and defining relationships.
  - Applied database design concepts including entities, attributes, and primary/foreign keys.
- Web-based Wedding Invitation | HTML, CSS, JavaScript, PHP, XAMPP** 2026
  - Developed a responsive wedding invitation website using HTML, CSS, and JavaScript.
  - Used PHP and XAMPP to store guest information in a database.
  - Designed and tested a simple guest registration feature connected to a database.
- Integrated School Management System | Business Analysis, UML** 2026
  - Analyzed the current business processes and identified operational problems within a school management system.
  - Identified stakeholders and documented functional and non-functional requirements.
  - Created UML artifacts including use cases, class diagrams, sequence diagrams, and system scope documentation.
  - Defined business objectives, assumptions, constraints, project risks, and success criteria for the proposed system.
- Online Shopping Application (HCI Project) | Figma** 2026
  - Conducted competitive analysis and user research.
  - Designed personas, user journey maps, information architecture, and user flows.
  - Created low- and medium-fidelity wireframes following user-centered design principles.
- Interactive 2D/3D Game | Unity, C#** 2025
  - Developed an interactive game using Unity Engine and C# scripting.
  - Implemented gameplay mechanics, scene management, and multimedia assets.
  - Applied game development principles throughout the project.
- Mobile Multimedia Production | Adobe Illustrator, Audacity** 2025
  - Designed a logo for a fictional mobile phone using Adobe Illustrator.
  - Created promotional multimedia content by recording and editing a voice advertisement using Audacity.

- Applied graphic design and audio editing principles to produce a complete branding concept for the product.

#### **Mobile Data Analysis Project | Python**

2025

- Performed data cleaning and analysis using Python libraries.
- Processed datasets and generated meaningful insights through data analysis techniques.

## **SKILLS**

---

#### **Programming Languages :**

- Java, Python, JavaScript, HTML, CSS, SQL

#### **Software & Development :**

- Object-Oriented Programming (OOP), Data Structures & Algorithms, Database Design, Oracle SQL, PHP, Unity, Figma, Draw.io, Adobe Illustrator

#### **Soft Skills :**

- Problem Solving, Communication skills, Team Collaboration, Time Management, Critical Thinking, Adaptability, Attention to details

#### **Concepts :**

- Software Engineering, Agile Methodologies, Networking Fundamentals, Human-Computer Interaction (HCI), Multimedia Technologies

#### **Languages :**

- Arabic (Native), English (Professional)
